SUMMARY

I am currently in my first year at Edinburgh University reading Computer Science. Having worked as a junior developer at a technology start up during my gap year, I have a good knowledge of using the unix command line and working on linux servers.

This experience gave me a love of problem solving. It also taught me how to work as part of a team and to thoroughly test my code before adding it into the codebase.

EMPLOYMENT

Wordeo Ltd.

Intern, October 2013

- Worked on tagging clips in a large video library

Technical Intern, November 2013 - January 2014

- Continued tagging clips, but also helped with error logging and tracking down root causes of errors
